Please consider investing some of your Spring Break into attending this event as a family.

MindTrap Question for all of our math scholars

Four sides of each of the nine regular die are exposed except for the top dice, which has 5 exposed sides—the four sides plus the top. The number showing on the top of the ninth die is 5. Given this information, what would be the total number of dots on the nine dice that are **NOT** exposed.

Congratulations to our students on their hard work this past quarter!
